

Do you want to contribute to medical innovation? Then join our team at **RetInSight!**

We are a spin-off of the Medical University of Vienna with the aim to bring the breakthroughs of science to the society and each individual, anywhere and anytime. Our expertise builds on more than 15 years of tele-ophthalmology and AI-based retinal image analysis. As pioneers in the field, we are developing cloud-based transformational AI solutions to improve patient outcomes, empower physicians to increase clinical efficiency and reduce healthcare costs addressing the leading eye diseases of our times. With your contribution we will protect millions of patients from irreversible vision loss and blindness.

For the expansion of our development team, we are looking for a

DevOps Engineer (AWS)

m/f/d, Vienna, Full-time, ASAP

Your Role

Within a Scrum team, you develop, build, support and maintain medical software solutions as service in AWS, to provide different segments of the healthcare system with AI-assisted medical image analysis. You work together with the development and QA teams on code review, CD/CI, config management, monitoring of the cloud-based data processing, optimization of the cloud services and providing customer support when needed.

Your Profile

- Experience with CI/CD (continuous integration, continuous delivery) pipelines and concepts and a good overview of related tools (e.g. Bitbucket pipelines, AWS Codepipeline)
- Solid skills in python programming
- Experience in designing and building of monitoring/logging/alerting capabilities in microservice based environment (AWS)
- Experience with modern source code management tools (i.e. Git)
- Experience with AWS resources such as VPC, Subnets, ECS, SSO as well as permissions handling for users and resources
- Experience with Infrastructure As A Code like AWS CDK
- Experience with agile software development lifecycle, from requirement specification to design, implementation, verification and validation
- Analytical, result-oriented, self-organized and structured way of working as well as reliability, proactivity, curiosity and readiness to take responsibility

Our Offer

- Room for own ideas in design and development of innovative products with global customers
- Friendly and supportive team culture
- Well-equipped workplace in a charming office in central Vienna
- Infrastructure and expertise in an agile and interdisciplinary team for high software quality standard to develop certified software as medical device
- EUR 55,000 per year (full-time, 38,5 hours/week) with the willingness to overpay according to your qualification.

Interested? We are looking forward to your application (including CV & cover letter) by e-mail to career@retinsight.com!
